I play this game when we are on drugs :) I'm always the best!. This game is simply amazing. I don't even have to say alot. Just make sure you have some intense music and good headphones, to add to the experience. I would have payed full price without a question.. This game rocks literally, one of the best shooters I have played so far. the game is influenced by your own music tracks. The higher the tempo or intensity, the crazier the game gets. Non stop shoot 'em up action and as much intensity as you can handle with many different difficulty levels. You can also desing your own ships for the comunity to try out and compete on. i bought this during the Steam Summer Sale so i got a great deal on it too.

Total Score 9V10.. This DLC make me forget my ship exist over all the lights...

seriously where the hell is my ship in those lights?. are you a fan of music?
are you a fan of having epilepsy?
are you a fan of spaceships?

If you answered yes or no to any of the above this then this is the perfect game for you

Have a relaxing game of epileptic seizure inducing, space ship shooting, rhythm based mayhem.
Throw on a your favorite drum'n'bass, techno or classical music and max out visuals to 200% (thats higher than 100% by a full 100%!)

Thats not even touching on the community workshops where you can get your mitts on some brazenly beautiful custom ships.
Want to dart around as pastel colored miniature equine? sure enough you can.
Want to float around as a Drumpfs hair shooting aliens like they're...well aliens? i guess you can..
Want to slip and slide past the enemy ships as the face of pepe the frog? i mean you can but why do you want to do that?

all in all this game has everything you need and more.

If you get Beat Hazard, you MUST get this as well.

This makes Beat Hazard 3 times as fun and full of content, with online 1 on 1 or Co-Op.... Many countless nights I took a whole bunch of speed and chased the insane achievements in this game. Absolutely worth every second. The dev took his already excellent game and set the level all the way to eleven.

You get more types of enemies (bosses included), new perks and online multiplayer.

The online multiplayer features co-op and head-to-head modes and has a nifty feature: the game indexes the songs you have on your PC, usually the ones found in the same folders you've been playing. When playing against someone else, it compares both lists and any track that shows on both of them will be playable as well as the included ones.

It is well worth the 3,99! What did you just sign up for? Let me lay it on you like that that told you she's pregnant and it's yours (I'm kidding, like any woman would sleep with your ugly mug). THIS...this is Beat Hazard where there's nothing but particle effects in your eyes. Not prone to seizures? yeah you are, you'll get one eventually.

Picture this: You just signed up for the Galactic Ship army to impress everyone back home on your home planet. Suddenly, you realize you suck at flying space ships and you're entire fleet has been destroyed because of your dumbass inability to keep formation. Stupid move you dumb lug, but there's hope: just go ahead and stand up to the entire enemy fleet with just one ship, a ton of unlimited ammo (oxymoron ftw) and your favorite tunes. Go out in a blaze of glory while blazing a Joint and blairing your horrid music. Seriously, if you haven't listened to my reviews buy this game, people will flock to you like seagulls.. If you own Beat Hazard and like it and you also have a bit of spare money, this is definitely a thing you should go for. Especially if you have any friends who like this game as well, it will be great to play with/against them in online mode. The only real problem is that you need to have certain song and it must have the exact same name and length because there is no multiplayer song synchronization system which would take upload the song from host's computer and download it to the other player's computer.

TL;DR: Good thing to have if you have any friend to play this game with! :). Why are you reading this?? Just buy it. Assuming you own Beat Hazard. Don't have Beat Hazard? Why are you reading this?? Go buy it.
